

Email Outreach Plan

How we introduce the websites we build — without getting flagged as spam

Prepared for approval · June 2026 · Cold-email program: Website Build & Website Improvement

THE PROBLEM WE'RE SOLVING

A link in a cold email looks like a scam

When a stranger emails a small business a link, most people won't click it — it feels like phishing — and spam filters bury it before it's even seen. Images on a first email cause the same problem. So instead of leading with a link, we **earn trust step by step**: a real, human-sounding note first, then a picture of what we built, and only then the link.

✗ The old way

"Here's a website I built you: [link]." Sent cold, on the first email. Reads as a scam, gets ignored or filtered to spam.

✓ Our way

A short, friendly note first. Then a screenshot that proves it's real. The link comes only once they're warm — so it actually gets clicked.

THE APPROACH

A 4-step sequence that builds trust

Each prospect gets up to four short emails, sent four days apart over about two weeks. The moment they reply, the sequence stops and our team takes over personally.

1

Day 0 — A friendly hello

Plain text only. We mention we built (or refreshed) a sample for their business and ask if they'd like to see it. Reads like a real person, lands in the inbox.

No image

No link

2

Day 4 — Show the work

If no reply, we send a screenshot of the website we made for them. They *see* the quality with no risky click required. Still no link.

Screenshot

No link yet

3

Day 8 — Send the live link

Now that they've seen it twice, we share the live link so they can click through and try it on their phone. By now we feel familiar, so the link gets clicked.

Live link

4

Day 12 — A gentle close

A short "should I take it down?" note. The light scarcity nudges anyone on the fence to reply.

Soft close

Reply at any point → the sequence stops automatically. No one who answers ever gets a follow-up meant for someone who didn't. A real person handles every reply from there.

Website Build — for businesses with no website

BUILD Personalized per business. Sender: "Sam from RateUp."

EMAIL 1 • DAY 0

PLAIN TEXT

Subject: A quick idea for {business}

Hi {first_name},

I'm Sam from RateUp. I came across {business} on Google and noticed you don't have a website yet — so I went ahead and built you a sample one, on spec, just to show what it could look like.

No cost and no commitment — I just thought it came out nice.

Want me to send it over?

— Sam

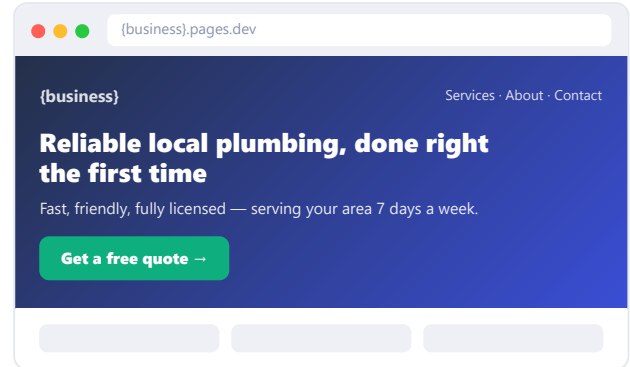

EMAIL 2 • DAY 4

+ SCREENSHOT

Subject: Re: A quick idea for {business}

Hi {first_name},

Here's the sample site I put together for {business} 📧

It's a real, working page — I can send the live link whenever you'd like to click around.

Worth a look?

— Sam

EMAIL 3 • DAY 8

+ LIVE LINK

Subject: Re: A quick idea for {business}

Hi {first_name},

In case it's easier to see it live, here's the working sample for {business):

[{business}.pages.dev](#)

Open it on your phone — it's fully mobile-friendly. Happy to tweak colors, photos or wording if you'd like it adjusted.

— Sam

EMAIL 4 • DAY 12

SOFT CLOSE

Subject: Should I take it down?

Hi {first_name},

I'll assume the timing isn't right and take the {business} sample offline in a few days.

If you'd ever like it back, just reply and I'll keep it live.

All the best, Sam

Website Improvement — for businesses with an old or dated site

IMPROVE Same flow, framed as a refresh of their existing site.

EMAIL 1 • DAY 0

PLAIN TEXT

Subject: A quick thought on {business}'s site

Hi {first_name},

I'm Sam from RateUp. I was looking at {business}'s website and thought it could use a refresh — so I mocked up a modern version to show what I mean.

No cost, no commitment.

Want me to send it across?

— Sam

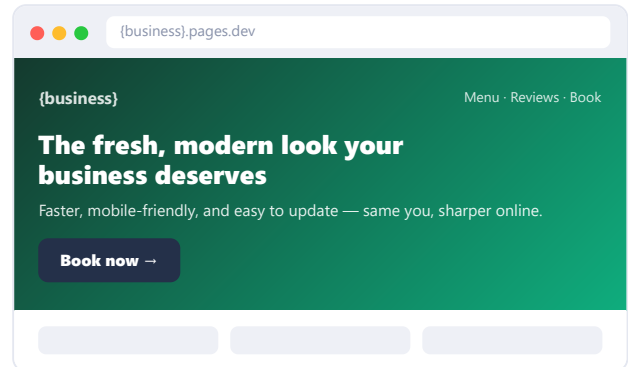

EMAIL 2 • DAY 4

+ SCREENSHOT

Subject: Re: A quick thought on {business}'s site

Hi {first_name},

Here's the updated version I put together for {business} 📧

Same business — just a cleaner, faster, mobile-friendly look. I can send the live link whenever you want to click through.

— Sam

EMAIL 3 • DAY 8

+ LIVE LINK

Subject: Re: A quick thought on {business}'s site

Hi {first_name},

Here's the refreshed {business} site, live so you can try it:

<{business}.pages.dev>

Open it on your phone and compare — happy to match your branding or drop in your own photos.

— Sam

EMAIL 4 • DAY 12

SOFT CLOSE

Subject: Should I take it down?

Hi {first_name},

I'll take the refreshed {business} mockup offline soon unless you'd like to keep it.

Just reply if you want me to leave it up.

Best, Sam

Every send is automatically reworded slightly (different greetings and phrasings) so no two prospects receive identical text — this keeps us out of spam folders.

HOW WE PROTECT OUR REPUTATION

Built-in safeguards

Verified addresses only

We only email addresses confirmed as real and deliverable — bad ones never get sent.

Gradual ramp-up

Daily send limits that grow slowly, so inboxes trust us instead of flagging us.

Stops on reply

The instant someone replies, follow-ups stop and a person takes over.

Easy opt-out

Anyone can ask to stop and we remove them immediately — no exceptions.

Screenshots, not attachments

The image shows inside the email itself — nothing to download, nothing suspicious.

One master off-switch

We can pause every send instantly if anything looks off.

HOW WE'LL MEASURE SUCCESS

What we'll watch

Reply %

Conversations started — the number that matters most

Email 2

How many open the screenshot email

Email 3

How many click the live link once warm

Spam %

Bounces & complaints — kept near zero

Approval

This outreach flow and the email wording shown above are submitted for approval, covering the Website Build and Website Improvement services. Live sending begins only after sign-off.
